No. 208.

Canadian Northern Line West of Edmonton Again Held Up---Plans Not Approved

C.N.R. AGAIN BALKADED IN EFFORTS TO LOCATE LINE TO YELLOWHEAD

RAILWAY COMMISSION AT OTTAWA HAVE DISAPPROVED OF THE ROUTE PLANS—LINE IS LOCATED TOO CLOSE TO G. T. P.—THE CANADIAN NORTHERN MAY HAVE TO RUN LINE SOUTH OF THE G. T. P.

Winnipeg, Sept. 9.—The Canadian Northern Railway is again balked in its efforts to locate a line west from Edmonton towards the Yellowhead Pass. Plans for the line from St. Albert west have been disapproved by the railway commission at Ottawa, on the grounds that the route proposed lay too close to that of the Grand Trunk Pacific.

The engineers first endeavored to run farther north, but could do so on account of the hilly nature of the country. It was decided, therefore, to parallel the G. T. P. route from Lethbridge to Yellowhead Pass.

Upon the Canadian Northern's convincing the railway commission of the necessity for running parallel to the Grand Trunk Pacific, a material change in the plans will be required. It is probable that the C. N. R. may find it necessary to run south of the Grand Trunk.

The C. N. R. was compelled once before to abandon their line west of Edmonton after a good deal of construction had been done. On that occasion the G. T. P. beat them out in the matter of securing and fitting the approbation of the route plans.

Interesting and vigorous representations are to be made to the rail-

way commission on behalf of the C. N. R. In the meantime work on the line west of St. Albert is abandoned.

Mr. Mackenzie, coming Vancouver, B.C., Sept. 9—W. L. Coulson, director and manager of Minto Canadian Collieries, Ltd., left last night for Edmonton with W. A. Mackenzie, president of the C. N. R., for the purpose of visiting the Brazeau coal fields west of Edmonton, to report on a plan of development. During his recent visit in London, Mr. Mackenzie raised seven millions for this. The coal is bituminous and well adapted for cooking and steaming purposes.

In view of the above doubt, it will be interesting to hear what Mr. Mackenzie has to say concerning the stopping of the construction on the main line west from St. Albert. The first active steps towards the building of the road were taken about June 20th, when Mr. Mackenzie, of the Northern Construction Company, visited St. Albert to look over the ground preparatory to subletting the contract.

The construction of the first hundred miles of the line is in the hands of the Northern Construction Company, of which Mr. Mackenzie, nephew of President MacKenzie, is chief.

London, Ont., Sept. 9.—There is a big stir here among G.T.R. men over the statement made by prominent railway officials that no more passenger traffic will be required. Such a statement was made by the strike-breakers continued to give satisfaction and they wanted to remain with the company, there would be no chance of the old men coming back.

THREE KILLED ON U. S. BATTLESHIP

Fuel Oil Exploded and Fire Resulted in Three Dead and Nine Injured

WAS NOT CARELESSNESS

"North Dakota" Was With Atlantic Fleet at the Time—Needed No Assistance

Fort Monroe, Va., Sept. 9.—Another of those tragedies which go to show that the sailor off the coast of his country is not as safe as he was when he was enroute this morning to the Dreadnought, North Dakota, while in Lower Chesapeake Bay. An explosion of fuel oil in the engine room cast the fires of three masts and more or less seriously injured nine others, including Chief Lieutenant Hurfin, Commander Section Shredder commanding the Atlantic fleet, late today made the following statement of the accident:

"Between 10:30 and 11 o'clock this morning from room No. 3 in the North Dakota caught fire while the first squadron of the Atlantic fleet was making passage from the southern end of the bay. Captain Lee could swim, and he but a little. They started to push the boat in towards shore into shallow water, but he was unable to get ashore. He was rescued by the crew of a row boat. The first two stood up to change seats and in moving upset the boat, precipitating all into the water. The boat was so small that they were unable to catch hold. One man could swim, and he but a little. They started to push the boat in towards shore safely, but looking around could see no sign of his companions. He informed the police as soon as possible and they getting grappling irons 40 yards away, secured him 45 minutes afterwards. The water is terribly cold just now and it is thought that the deceased must have been dead for some time before he was found."

Lane is of Scottish descent. He has a brother here and it is believed parents in Wawanesa, Man. Montgomery is an Irishman and that he died in July.

NEGLECT CHARGED AGAINST DRIVER

Father of Little Boy Who Was Run Over by Wagon Takes Action

A. W. Watson, a driver, was charged in the police court this morning with neglect, which resulted in his son being run over by a team. On Saturday, Aug. 25, Watson, a member of prominent Edmonton business men were present and at which several of the members from Bristol spoke regarding their impression of this case.

An excellent luncheon was served in the dining room of the hotel, after which the speakers addressed the audience.

Mr. George, president of the Board of Trade, opened the proceedings with a short speech welcoming the members of the Chamber of Commerce to the city.

"We have come," he said, "to gain information about the country so that they may tell their friends at home the true state of affairs. The agricultural and industrial capital of the world, but we do not want the man with a great deal of capital much as the man with a little capital, who is willing to work and produce. It is production that we need."

Mr. McGeorge then touched upon the friendly relations between England and Canada, and the importance of the Canadian market.

"We are just as British as you are, although you are nearer London, England."

Mr. George then gave the members of the delegation some statistics concerning the city and its growth, to help them in their search for information, and then introduced the Mayor, who made a short speech of welcome.

The speaker, Mr. McGeorge, then introduced the Hon. Mitchell, the Attorney General.

"We're practical, but we're doing our best to make the country happy," said the Attorney General. "We have the same laws as England and I think I may say that they are just as well enforced."

He then went on to speak about the educational advantages of the country. "One new school district is opened for every school age in the year in which it stands," said "last year we hope that this number will be increased." The Englishman who comes to this country has every chance for his children's education.

COLD WAVE LEAVING US

The cold wave which yesterday was principally confined to Edmonton is now widespread for both Calgary and Regina were called on to share it with the former registering a temperature of 26 degrees below zero, while Edmonton with 27 was only degree than yesterday. However, the weather man informs us that it is traveling to its proper habitat, the north, and will leave us in the Alberta sunshine we are so accustomed to.

Meanwhile, we need be in no panic over the fact that travellers coming in report that the cutting is practically completed and provided the sun stays out the farmer can now afford to laugh at the past vagaries of the weather.

G.T.R. WON'T TAKE BACK ANY MORE STRIKERS

London, Ont., Sept. 9.—There is a big stir here among G.T.R. men over the statement made by prominent railway officials that no more passenger traffic will be required. Such a statement was made by the strike-breakers continued to give satisfaction and they wanted to remain with the company, there would be no chance of the old men coming back.

RILEY RECEIVED HIS NOMINATION

Is Named by the Independents As Their Candidate in Gleichen

Calgary, Sept. 8.—The name of E. H. Riley is the only one before the convention to nominate independent candidates for the approaching election in Gleichen, and he has been nominated. Two hundred attended, eighty-eight being delegates from different districts of the province.

In answer, Mr. Riley spoke that he was resigning. The action of the independent convention in asking the election of the party to which he belonged over the reins of power, he said was the driest piece of political jargon that ever came out of the history of any province in Canada. His name should have been selected, who would have cleaned out the whole bunch of foreign railway promoters and destroyed them.

Mr. Riley declared himself a Liberal, but not a idle bound Liberal, while the party which won the election, he said, "have been accused of feeling some," he said, "because I did not get a higher percentage of the vote than any other party."

He then said that the independent convention had offered me, but I was not built that way."

Mrs. R. Bennett endorsed Mr. Riley's charge. A. T. Maxton, the Liberal candidate in Gleichen, with appealing to the constituency as a support of Riley, and even pointed out that he had been nominated by the Conservative party.

The following were chosen officers: President, Henry Wallace, Dauphin; secretary, Thomas R. Shipps, Indianapolis, Indiana; treasurer, D. A. Latchaway, Kansas City; Clifford Pinchot and J. B. White, of Kansas City, declined to be nominated for the presidency and Mr. Wallace was not opposed.

The conservatives have rejected the line with the exception of the St. James.

He then went on to speak about the educational advantages of the country. "One new school district is opened for every school age in the year in which it stands," said "last year we hope that this number will be increased." The Englishman who comes to this country has every chance for his children's education.

(Continued from Page Five.)

SMALL BOY CAUGHT

He Turned in a False Alarm and Landed in Police Station

Harry Gold, a thirteen-year-old boy "just for a joke," as he termed it, rang up "60" about 7 o'clock this morning, which number placed him in communication with all the city fire stations, and reported a fire at the corner of Fifth street and Athabasca, giving two brigades a useless run. The boy was caught by one of the city detectives shortly afterwards and brought to the police station. He was given a warning and permitted to go. False alarms have been unusual occurrences for some time but the police wish it understood that they will deal severely with any such cases in the future.

His Explanation

This space is reserved for the explanation of the Ex-Minister of Public Works.

NEW ISSUE OF LAW STAMPS JUST OUT

They Are of Very Fine Workmanship and Are Improvement Over Others

DESIGNED BY MR. BLAIN

Issue Is in Eleven Denominations and Each Is a Different Color

A new issue of law stamps has been placed on the market by the attorney-general's department. The new issue differed from any of the past, not only in design, but in quality, workmanship, and general appearance. The design of the new issue represents "Justice" sitting on her throne, holding in her left hand the scales, and in the other the sword. The issue is in eleven denominations, \$1, 2c, 20c, 25c, \$50, \$100, \$1,000, each one being in a different color.

This is the third issue of law stamps in the history of law, the first issue, the first one being printed, the second lithographed, while the new issue represents the skill and art employed by the American Bank Note Company. The object in having the new issue engraved in security. In the other cases, plates were not guarded to any degree. With the American Bank Note Company, however, the plates are kept with as much regard for their safety as is given to the plates from which postage stamps or bank notes are made.

Mr. A. Blain, deputy attorney-general, originated the design.

TWENTY VACCINATED

This Is the Last Day for Vaccination of School Children

TODAY DID NOT FIX RESPONSIBILITY

Syndicate Avenue Murder Committed by "Person or Persons Unknown"

LITTLE NEW EVIDENCE

A New Name Is Brought Out in Inquest Held last Night

The inquest into the death of Ross Fedeniuk, the Bohemian who was killed on Sept. 10th at the corner of Syndicate Avenue and the C.N.R. right of way, concluded last night, the verdict jury brought in a verdict that the killing was the act of a person or persons unknown.

Besides the evidence of Doctor J. Wood and J. C. Graham, who performed the post mortem examination, and that of Dr. H. C. Graham, chemist in the provincial laboratory, who analyzed specimens of the mud, moss, and leaves found near the scene of the killing, there was no other evidence of their kind on the witness stand.

THE EXHIBITS GOOD

They Are Attracting Much Attention From Visitors at the C.N.E.

City Commissioner Butchart, while in the east attended the national exhibition in Toronto. He states that the exhibits are of great interest and attract much attention, and that they stand favorable comparison with any other exhibit of their kind on the grounds.

CYCLONE SWEPT OVER B.C. VILLAGE

Roof Torn Off, Barn Wrecked and Windows Smashed by Force of Gale

Nelson, B. C., Sept. 8.—A cyclone wind storm in Cranbrook yesterday did considerable damage, tearing off roofs, windows and doors, and destroying a house built of logs.

So fierce was the wind that it nearly blew down the trees in the village.

The post mortem examination showed that the body had been beaten to death.

The man had been drinking on the day of his death.

Stanley Blozak, testified to meeting the man on First Street between the King Edward and the St. James hotel.

References were made to two strange men who were in the employment bureau office about 2 o'clock in the afternoon with Fedeniuk. One of them was a man named Miller, who had been drinking on the day of his death.

The mounted police had found traces of alcohol but not enough to prove that the man had been drinking on the day of his death.

Stanley Blozak testified to meeting the man on First Street between the King Edward and the St. James hotel.

May Harness the Power of Half-a-Dozen Falls

Engineer Fielding, who has been appointed by the city to investigate the Athabasca River, has proposed that water will return to the city within a few days to renew his conference with City Engineer Latorelli. Mr. Fielding will likely start about the 20th of the month for the scene of operations and will take with him a party of about three. It is thought that it will be possible to harness several of the falls on the Athabasca river, including Grand Rapids, Pelican

Rapids, Stony Rapids, and the Rap du Joli Falls. Grand Rapids is about 23 miles north of the Rap du Joli Falls, while the others are about six miles apart.

The distance from the city to the location of the plant will be about 170 miles, but it is not thought that much energy would be lost in the transmission of the power. Of course, it depends almost entirely on the size of the conductors, and the voltage of the transmitter.

YOUNG R. C. CLERGYMEN MUST NOT EVEN READ THE PAPERS

Rome, Sept. 9.—Pope Pius X has issued a decree providing new and practical measures to be adopted against the growing modernism in the church. The pontiff reiterates all of the rules previously set forth, against modernism, especially in the encyclical *Pascendi dominici gressus*, and adds that the bishops and the rectors of the Catholic colleges must pay attention to the development of the young clergy, seeing to it that they are well prepared for their early formation to read newspapers and periodicals without detracting from their studies.

Every professor, in beginning his course, every teacher, and every cleric being promoted or advanced, especially in the ecclesiastical service, must be examined by the bishop of his diocese.

The pontiff also directs that the confessor of the young clerics must be examined by the superior of the seminary where they have been educated until September 14.

London, Sept. 9.—The crown prosecutor is steadily unravelling a chain of evidence with which they expect to convict Dr. Hawley H. Crippen of the murder of his wife, the music hall singer, Betty Balfour, and Le Neve as accessory after the fact. It was expected that important medical testimony would be given early in the trial, especially from Dr. J. W. Dewey, the coroner, but he has delayed until the counsel for the defence have had an opportunity of viewing the remains. The trial has therefore been adjourned until September 14.

"I stopped and spoke to him," said the witness, "because I noticed the clothes were like those worn in my native land. He had been in Canada and how he liked it. He told me that he did not like it at all and wanted to go back. He is now in my wife's place and an employment bureau which would ship him to Winnipeg. I took him to one and he was told there that he could not be employed there and he would be shipped to this side of Saskatoon. He paid his dollar and I wrote the name of one of the stations he was to get on at one end and gave it to him. He told me that he had a friend here named Bonny, who knew the names of all the stations. I know the name of the man, but forgot his name."

"The next time I saw Bonny he was with his wife," said Fedeniuk. "Bonny was with him. I saw Fedeniuk show him his card. I know his name."

"Have you seen this Bonny around since?" asked Crown Attorney Clegg.

"The last time I saw him," returned the witness, was on the Monday following the last cyclone of the year, near the Jasper hotel. "I don't see him since."

Edelenik again again between 5 and 6 o'clock in the morning when he was killed on Blozak's front door. He stated that Fedeniuk hooked under another name, but he did not remember what it was.

"At about two o'clock, Fedeniuk came into my office with an interpreter and I booked him for a job. He was drunk and when he came in he was in a bad temper. I asked him if he was drunk and he said yes. There was another man there at the time but I forgot his name. The two of us were down on the floor and I lit a candle on the identity and whereabouts of the other two."

The post mortem examination showed that the body had been beaten to death. The wind had blown the glass in the window of the Murphy block were blown in. It is believed to be the first cyclone ever known in British Columbia.

References were made to two strange men who were in the employment bureau office about 2 o'clock in the afternoon with Fedeniuk. One of them was a man named Miller, who had been drinking on the day of his death.

"At about two o'clock, Fedeniuk came into my office with an interpreter and I booked him for a job. He was drunk and when he came in he was in a bad temper. I asked him if he was drunk and he said yes. There was another man there at the time but I forgot his name. The two of us were down on the floor and I lit a candle on the identity and whereabouts of the other two."

The mounted police had gone from here to verify the report and if possible to identify the victim.

WAS MURDERER SHOT?

Moose Jaw, Sept. 9.—A report reached the court that a man answering the description of Miller, wanted for murder in the Blue Hills district here last June, was shot in Pierre, S. D., while resisting arrest. The mounted police have gone from here to verify the report and if possible to identify the victim.

A POLICY OF SILENCE

There are several things in which the public of this province are very much interested just now. One is the report of the Royal Commission on the A. & G. W. Another is the fate of that road itself. And a third, up to a few days ago, was the date of the coming by-elections in Gleichen and Macleod.

On several occasions recently reporters from various papers have approached Premier Sifton and questioned him in regard to those things. A gentle, if somewhat superior smile, transmitted through his secretary to the reporters waiting in the anteroom of his office, has been the usual reply. Now, why the need of all this mysterious silence. A straightforward answer to the representatives of the public would be far more satisfactory.

If the public, through the press of the province, desires to know if the report of the Royal Commission is finished, why shouldn't it be told? For whom was this commission acting? For the executive council or the people of the province?

Suppose if this report is finished, it would be just as well for the premier of the province to say: "Yes, the report is finished. It has been handed in to me. Its contents will not be made public until the legislature meets."

Some such statements as these would clear away the air of deep mystery surrounding the premier's office at present. They would tell the public what they should know, and yet would not impair any information for the public that should not be known just yet.

Publicity in public affairs is a good motto.

GERMAN BUSINESS METHODS

The following little extract from the "Exporters' Review" is a hard slap at New York and London business firms:

A commission house in Lima received an inquiry for a machine in regard to which it had no information. Pro forma orders were sent to New York and London and Hamburg. In from four to six months a short answer arrived from New York quoting a price in United States gold at which the manufacturers would deliver the machine at some later point in Michigan; no other information.

In from three to five months the answer from London was received. They quoted a price in sterling at which they would deliver in London, sent a photograph of the machine and expressed a polite wish to have the order.

The answer from Hamburg came by return mail. It consisted of a pro forma invoice made out in Peruvian money, showing all the expenses that would be incurred and giving the cost delivered in Callao Bay together with a blue print of the machine and instructions in Spanish for setting it up, and yet people wonder why the Germans are getting more and more of the business.

EARL GREY'S TRIP

Earl Grey's account of his trip to the north rather explores the ancient idea of a frozen country. He speaks of a large amount of good land and the existence of mineral wealth.

There is a fertile agricultural country in the Hudson's Bay district there is little reason to doubt. The members of the geological survey certified to this years ago and they also expressed an opinion in no measured way that in the future this region would be one of the greatest mining districts of the Dominion. Where the members of the geological survey, however, were unable to bring conviction to the people Earl Grey will succeed. And in this will consist the value of the work which he seeks to do and which without doubt he will accomplish. His statement that the Hudson's Bay region is not only habitable but is one of the most desirable parts of Canada by reason of its latent re-

source will turn attention to that direction and will lead to exploration in that direction. And that exploration will in turn lead to the investment of capital for the development of the country.

Already of course the Ontario government has given impetus to discovery in the district about James Bay to which before long a railway will be running and once the boundaries of Manitoba have been extended, as they no doubt will be, to the shores of Hudson's Bay, encouragement will be lent to the enterprising people of the prairie province to see where there is to be secured from their new area. But with all that may be done by the provincial governments or even by the federal government in bringing this situation before the attention of the world Earl Grey's general word will be of unequalled value. The world will accept what he has to say without hesitation and the association of his name with a report of the region's latent richness will be of the highest and most immediate advantage to it.

What Others Say**VERY OBLIGING**

(From the Vancouver Province)
Some men will do anything to oblige a lady. A New York woman remarked to her husband that she wished he was dead so that she could marry a man she really did like, and he promptly went out to the woodshed and shot himself.

DIFFERENT THERE

(From the Houghton Post)
Ethel Leneve and Dr. Crispin were kissed by the London crowds. In New York they would have received bouquets. It will be well for the thinking person to watch the trial of Crispin and observe English methods of criminal procedure; there are a few things they do better in England than in this country, and the handling of criminal trials is one of them. We have a great deal of respect for the English courts even if we do laugh at Scotland Yard.

TARIFF PROBABILITIES

(From the Toronto Star).
Referring to the demands of some western farmers for free trade, our correspondent, E. M., says: "Why do we now discover that it was dishonest to select one section of our people and put them on the shoulders of the real producers, to be enriched by those innocent beasts of burden? Why, just because the Western farmers see through the joke and will henceforth refuse to carry unnecessary burdens."

The demands of the Western free trader do not affect the justice or injustice, the wisdom or the unwisdom, of the tariff, but they do have a bearing on the question of what the tariff shall be. The people, if they choose to assert themselves, can have any kind of tariff they please. Protection exists by the consent of the people, as soon as that consent is withdrawn it will fall. The free trade movement in the West will not strengthen the faith of our correspondent, who is already a convinced free trader, but it will strengthen his hope.

The Star has been and always will be on the side of increased freedom of trade, but it does not believe in holding out false hopes to free traders. It believes that the process of reduction will be gradual; not because the Laurier Government or any newspaper says so, but because that will be in accord with Canadian public opinion as a whole. The question we are considering is not what our correspondent and the Western free traders de-

sire, but what they are likely to obtain. And in discussing that likelihood the use of exaggerated language will serve only to mislead.

NEXT YEAR'S IMPERIAL CONFERENCE

From the Ottawa Journal.
Although the re-assembling of the quadrennial Imperial Conference is now within measurable distance, there does not appear to be any enthusiastic desire upon the part of the self-governing dominions to suggest subjects for discussion. The fact seems to be that as there is no dispute for friction at present, the over seas dominions are of opinion that things can be allowed to proceed as they are until Great Britain decides that the time has come for a re-casting of the fiscal relations between the Mother Country and the dominions, if that day should ever arrive.

The London Times confesses its disappointment at this indifference on the part of the self-governing nations of the Empire. It is especially disconcerted because the enthusiasm of the Imperial socialist has not been accepted with more enthusiasm by the dominions. It regards the three years' silence of Canada and New Zealand as somewhat ominous for the future of the experiment. But the value of the new departure may probably be reckoned by the silence of the two dominions. If the scheme was not working satisfactorily the two governments would have probably started their belief to that effect. In this case, as in so many others, silence may give approval.

Th only subject so far proposed for discussion at next year's conference is one brought forward by the Mother Country. It comes from the Home Office, and has to do with the deportation by the self-governing dominions of undesirable aliens. It is stated that some of the overseas states have made it a practice to deport such aliens back to England, where they have arrived via an English port, and that they have thus become a charge upon the British taxpayer. The British Government will not protest against the rejection of British subjects, who fail to come up to the standard set by the authorities, but it does decide to object to having to deport aliens who make English ports their means of transit to the new lands.

It is difficult to see how the problem can be solved. Shipping companies trading between Britain and Canada, for instance, cannot be expected to carry rejected aliens back to Bulgaria or Russia, unless they have a share in their transportation from their native lands. It is true that Canada has made it a condition that immigrants who do not come direct from the land of their origin are debarred, but there is apparently a loophole somewhere in the working out of the scheme, or else the British Government would not have raised the point.

The fact that the Premiers to attend the conference are mainly of one mind as to the necessity of leaving the tariff question alone until Britain has changed its attitude theron, will probably prevent the fiscal question being made much of an issue. Laurier of Quebec, Fisher of Australia, and Botha of South Africa are all agreed on this point, and even Ward of Newfoundland will probably be convinced of the wisdom of forcing the topic upon the conference when the time is not ripe for its discussion.

QUOTE EVIDENT

" Didn't a scientist say not long ago that insanity was increasing?"

" Yes."

" I believe he told the truth."

" What makes you think so?"

" I see where somebody has written a song entitled, 'Oh, You Spearman Kiddo With the Wriggly Eyes.'"

NEW FALL SUITS FOR MEN AND BOYS

Main Floor, Jasper entrance

We point with pride to the fact that we are winning the trade of the most ultra-faustidious young men in town! This is no small triumph. We have been working for years to accomplish this end. We make no secret of it. We know that if we can satisfy the modern young man, we can satisfy ANYBODY!

The one big thing we are featuring just now, the one big thing which is such a factor in winning the young men is our own special line of Hudson's Bay Co. Suits at \$20.00. Never were better fitting clothes made! Never was such tailoring found in such a suit at the price. Never were such selected patterns, such rich colorings and such nice weaves marked at anything like the price we ask.

If this sounds sincere to you, slip into the busy store any day this and next week and say to the first salesman you meet:

"I want to see those new Hudson's Bay Co.'s Suits for \$20.00

New Poult de Soie Silks

A silk lining that will last as long as the garment. A full line of all the new fall shades.

A TERRIBLE CASE OF LESE MAJESTE

A Schoneberg Boy of Five Had His Trumpet Confiscated by a Policeman

Berlin, Sept. 7.—A portion of case of less majesty committed by a boy of five in the suburb of Schoneberg is engaging the attention of the Berlin police.

The motor cars of the Imperial family always carry on the box a trumpeter who disperses the traffic with bugle blasts well known to the inhabitants of Berlin. The other day a Schoneberg urchin was playing on a toy trumpet on a second-floor balcony. Accidentally he made the familiar call. The edges of the piano keys were instantly set upon the young subject, and he saluted the Imperial motor-car. A lieutenant in full uniform who was crossing the street clicked his heels and sprang stiffly to attention in the middle of the road.

Three minutes passed, but no car appeared. The unsophisticated archie then happened to repeat the blast, revealing the source of the signal. After a moment of astonished astonishment at the boy's presumption, the officer hurried round the corner for a policeman. Returning with one, he indicated the house, and in loud sharp tones of command ordered the constable to do his duty. The man saluted, hastened upstairs, and confiscated the trumpet. The boy's parents are now anxiously awaiting the legal consequences.

GOOD NEWS THIS WEEK FOR SURVEYOR AND PROSPECTOR

We have received complete stock in every line and size mentioned below.

Men's Khaki Coats, made Norfolk Style with two side pockets. Trousers to match with belt loops, cuffs. This khaki is genuine, imported from the Kootenay Engineering Works, Ltd., also a number of other houses. These are worth more than the worst and hottest Nelson ever had, destroying property worth \$10,000. There is a building in Nelson that could burn and be any hotter than the Kootenay Engineering Works, in which stood one of your No. 345 thin double door, half-Sale. The heat was so intense it was impossible to stand near it thirty yards, lasting about two hours. The water thrown towards it, with 150 pounds pressure per square inch, did not penetrate, but the heat on the breeze before reaching the burning flames. The dial was burned off, the hands were melted, and the scale was badly warped from the heat, but it did the work it was built to do, for when opened by the manager of the Kootenay Bank, Mr. J. M. Lay, the contents were in better order, which could hardly be expected of any safe.

It would gladly recommend the Hall safe to its fireproof qualities. Yours respectfully,

D. GUTHRIE,
Chief Nelson Fire Department, Nelson, B. C.

Percy H. Johnson, Esq.,
Norris Safe & Lock Co.,
(General Agents, The Halls Safe Co., Cincinnati, Ohio.)

Dear Sir,
(Kreyser's Shingle Mill Fire at Nelson, July 5, 1910.)

I am in receipt of your dated letter, and in compliance with request you made in your letter, I have visited the scene of fire mentioned above and made a thorough examination of the Halls Safe which came through the fire. With the exception of the outer door, which was partially melted, there was no damage whatever. The interior was perfectly safe. When removed showed no signs of damage. An informed that this was an exceptionally hot fire, and that your safe stood the test so well.

J. A. MCVARIC,
Trav. Auditor, C. P. R.

Percy H. Johnson, Esq.,
Norris Safe & Lock Co.,
(General Agents, The Halls Safe Co., Cincinnati, Ohio.)

Dear Sir,
This is to certify that the Halls Safe of the Kootenay Engineering Works, Ltd., during the recent fire, July 5th, after being exposed to the heat, was found to be in good order. I understand that the number of safe was No. 345 this wall. Being a very nerve fire your safe stood very well.

Yours truly,

C. P. R.

J. A. MCVARIC,
Trav. Auditor, C. P. R.

Percy H. Johnson, Esq.,

Norris Safe & Lock Co.,

(General Agents, The Halls Safe Co., Cincinnati, Ohio.)

Calgary, Alta.

Dear Sir:

This is to certify that the Halls Safe of the Kootenay Engineering Works, Ltd., during the recent fire, July 5th, after being exposed to the heat, was found to be in good order. I understand that the number of safe was No. 345 this wall.

Exactly," said Mr. Prinrose, "but

his father did hit one, it

generally below the belt."

"There are some swell new things in Men's Soft and Straw Hats at Kelby & Moore's."

STATIONARY ENGINEERS

Meeting for Discussion Held Last Night is First of Many.

The meeting of the Alberta branch of the society of Stationary Engineers held last night in the Mechanics Hall, was in every way a great success and some very interesting papers were read. Mr. P. McNaughton, the chairman, opened the meeting with a few words on the object of holding these gatherings of which this was the first.

Mr. A. McLean read a very interesting paper on "The Setting of a Boiler." There were three points he submitted always to be taken into serious consideration: The stable foundation, allowing for expansion, the expansion chamber, and the cover to prevent the loss of heat. He then went on to enlarge on these three points.

Major Lee read a paper on "Manufacturing as a manufacturing centre. Touching on what lines of goods might be manufactured he said there was room for nine different classes of goods: Tannery, leather goods, flax mills, woolen mills, biscuit factory, clay products, furniture carriages and soap. The man said might all be produced in Edmonton.

Mr. A. J. Latimer spoke on the responsibilities on an engineer brought in three positions in which the engineers hold the first place in regard to the safety of the public. The engineer gets the blame when the street car stops and the people are killed, or when the building falls and people are killed.

The engineer has three duties to be performed, that to his employer, to the public and to his profession, he must be practical and a student all his life. Carelessness and dishonesty are unbecoming, and a man's reputation is very poor indeed.

Mr. Von Auhburg a. Mr. Joseph Adair both made short speeches, and the meeting came to a close. Between the papers there were several songs and musical numbers. Miss Buck and Mr. J. G. Fisk sang and Miss Bladell and Mr. Bowman gave violin selections. Miss Buck and Mr. Bladell receiving a large amount of applause for the selection which she played with great feeling and masterly touch.

COMMISSIONERS' MEETING

The city commissioners yesterday afternoon discussed an amendment to the building bylaw on account of the recent decision of Judge Taylor, although no definite decision was reached it was suggested that alterations to wooden buildings in the first class fire limits be permitted.

John Edward's claim damages from the city through his buggy being smashed in a collision with a street car near the packing plant on September 6th. He states that he was driving towards the packing plant when the wheels of his buggy became imbedded in the deep mud located between two mounds of earth on which he says there were no lights. A car from the south collided with his buggy and smashed it. Edwards claims \$25.

As a result of this complaint it was decided to offer a reward of \$10 for information that would lead to the conviction of persons removing light fixtures while they are placed for the warning of drivers.

The work on the car barns will be proceeded with by day labor on account of the weather, the sky looking dark and threatening.

Mr. S. Manders applied for the return of a deposit check given to the city for the construction of a bridge.

The city will make inquiries with the contractor who has the power to retain the check as partial settlement of the city's claim against Mr. Manders.

The city will make inquiries with a view of taking over the water delivery service to outlying points.

NEW JOB FOR BILLY

(Canadian Associated Press)

The Hague, Sept. 8.—Hon. Mackenzie King, Canadian Minister of Labor, has been appointed one of the vice presidents of the Permanent International Committee on Social Insurance.

IT GENERALLY IS.

Greatly to the pride and pleasure of his father, Lord Rosebery's second son, Hon. Neil Primrose, was elected to Parliament for a division in Cambridge.

During the contest, however, reference was constantly made to Lord Rosebery's opposition to the budget, which his son supported.

On one occasion the candidate was asked whether this action on the part of his father did not amount to "biting the hand that fed him."

"Exactly," said Mr. Primrose, "but my father did hit one, it was generally below the belt."

There are some swell new things in Men's Soft and Straw Hats at Kelby & Moore's.

Grain prices today are: Futures—October, 1,03½; December, 1,03½; May, 1,01; 1,01½. Cash (sheaf)—No. 1 Northern, 1,03½; number 2 northern, 1,01; Number 3 Northern, 99¾. Oats, 35; flax, 24½.

R. L. Shaw, M.P.P., of Stettler, is in the city a guest of the Alberta Hotel.

Mr. J. W. Stewart, managing director of the Monarch Life Assurance Company, of Winnipeg, is in Edmonton with a view to opening a branch of the Monarch Life here, which that company has decided to locate here as headquarters for Northern Alberta.

This morning the route of the street railway has been further changed on Jasper avenue and the Twenty-first street car will now run down Jasper to Syndicate instead of turning up Namayo. Those wishing to go up Namayo will take the Namayo car which runs up Namayo from Jasper avenue and along Sutherland to Syndicate street.

Now that the sportsmen of Edmonton are in the sun-path and have already donned feathers and war-paint, it would be as well to point out that the chicken and partridge season does not open till the 1st of October and closes the 1st. The limit to each hunter is twenty birds per day or two hundred for the month. The sale of these birds is absolutely prohibited at any time.

JAS. McDougall TO EUROPE

Winnipeg, Man., Sept. 9.—James McDougall, formerly of the Hudson Bay Company, Edmonton, is in Winnipeg enroute to Scotland, almost fully recovered from his recent very serious illness.

APPEAL ALLOWED

Judgment was handed in to the District Court this morning in the appeal of the case of the King vs. E. J. Boileau. Boileau was fined \$10 and \$13 costs for voting at a constillars election at Brossard when he was not entitled to vote.

Boileau appealed against the decision which was given by the magistrate S. A. Richardson, and during the hearing of the appeal it was found that he had signed a declaration form that had been repealed and therefore was null in existence. The appeal was allowed with costs.

There have been a lot of good books published lately. They can be bought at Little's Book Store. No charge to join their library.

Watch on Saturday for bargains in stationery at Little's. See the display in their window.

FOR SALE—LOT ON CAREY ST., Northwood, high and dry, good location. Price \$475, half cash, balance to suit buyer. Apply T. J. Robson, 633 Fifth St. City.
